DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of claims 8-15 in the reply filed on 01 September 2006 is acknowledged.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 8 is rejected under 35 U.S.C. 102(b) as being anticipated by Buhse.

There is disclosed in Buhse an ice-cream cone (food product) formed as a half-shell having a mouth delimited by an annular surface and a side wall, in which the mouth annular surface and the side wall surface have a smooth surface finish, and the outer surface on the side wall has a porous, continuous region 7 which extends peripherally and is receded relative to the mouth annular surface of the half-shell.

Claims 10-13 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Aasted.

There is disclosed in Aasted a food product comprising two wafer half-shells 10, 10; 12', 13'; 12", 13"; 12"', 13"' coupled one to the other along annular mating surfaces defining their mouth profile, wherein the annular mating surfaces of each of the half-shells have centering means complementary one to the other.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 8, 9 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Aasted in view of Buhse.

Buhse, as discussed above discloses a porous, continuous region extending peripherally and which is receded relative to an annular surface of a half-shell.

It would have been obvious to one skilled in the art to form the food product of Aasted with a peripherally extending member as taught in Buhse, in order to limit contact of portions of the food product when stacked upon each other.

Response to Arguments

Applicant's arguments filed 16 March 2007 have been fully considered but they are not persuasive. Applicant argues that the prior art reference of Bushe fails to disclose an outer surface and peripherally extending surface which have a porous finish. While it is stated in Bushe that the outer surface and extending element can be coated with chocolate, it is also taught that preferably they would not be coated. In Bushe at col. 1, lines 9-27 and col. 2, lines 62-65 it is taught that the internal surface of the cone is to be coated while the exterior remains as a baked pastry surface.

In response to applicants argument, that even without the outer chocolate surface coating, the cone of Bushe would have arguably the same smooth surface finish. It should be noted that it is known in the art that a baked pastry item would have

Art Unit: 1761

a porous finish to it baring any modifications thereto. Wafer batter always bakes to a porous finish.

Applicant argues that because Aasted uses thermoplastic food materials and the heating and cooling processes used to join them, it fails to disclose all of the features recited in claim 10. A review of the claim fails to disclose any limiting features which would preclude the materials or methods used in Aasted. The structural limitations of the claim have been met by Aasted.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
